The Neoliberal Diet Gerardo Otero, 2018-10-03 This remarkable comprehensive study of neoliberal agribusiness and the obesity epidemic is critical reading for food studies scholars Contemporary Sociology Obesity rates are rising across the United States and beyond While some claim that people simply eat too much energy dense food while exercising too little The Neoliberal Diet argues that the issue is larger than individual lifestyle choices Since the 1980s the

shift toward neoliberal regulation has enabled agribusiness multinationals to thrive by selling a combination of meat and highly processed foods loaded with refined flour and sugars a diet that originated in the United States Drawing on extensive empirical data Gerardo Otero identifies the socioeconomic and political forces that created this diet which has been exported around the globe at the expense of people's health Otero shows how state level actions particularly subsidies for big farms and agribusiness have ensured the dominance of processed foods and made fresh foods inaccessible to many Comparing agrifood performance across several nations including the NAFTA region and correlating food access to class inequality he convincingly demonstrates the structural character of food production and the effect of inequality on individual food choices Resolving the global obesity crisis Otero concludes lies not in blaming individuals but in creating state level programs to reduce inequality and make healthier food accessible to all

Labour and Economic Change in Southern Africa c.1900-2000 Rory Pillosof, Andrew Cohen, 2021-06-03 This book explores the social and economic development of Zimbabwe Zambia and Malawi over the course of the twentieth century These three countries have long shared and interconnected pasts All three were drawn into the British Empire at a similar time and the formation of the ill fated Federation of Rhodesia and Nyasaland formally linked these countries together for a decade in the mid twentieth century This formal political relationship created dynamics that resulted in yet closer economic and social links After Federation the economic realities of industry transport and labour supplies meant that these three countries continued to be

intricately interconnected Yet despite these connected pasts comparative work on the economic histories of Malawi Zambia and Zimbabwe and how these change over time is rare This book addresses the gap by providing the first comprehensive collection of labour and census data across the twentieth century for these three countries The different economic models and performances of these states offer good comparison allowing researchers to look at different models of development and how these played out over the long term The book provides data on population growth and change industrial and occupational structure and the various shifts in what the economically active population did It will be useful for historians economists development studies scholars and non governmental organisations working on twentieth century and contemporary southern Africa

An Endogenous Theory of Property Rights Peter Ho, 2018-10-15 From a neo liberal neo classical paradigm secure formal and private property rights are crucial to fostering sustained development Institutions that fail to respond to shifting socio economic opportunities are thus forced to make new arrangements The enigma is posed by developments on the ground Why would the removal of authoritarian institutions during the Arab Spring or Iraq War not increase market efficiency but rather cause the reverse while China and India despite persisting insecure informal and common institutions featured sustained growth This collection posits that understanding these paradoxes requires a refocusing from form to function detached from normative assumptions about institutional appearance In so doing three things are accomplished First starting from case studies on land it is ascertained that the argument can be meaningfully extended to labour capital and beyond Second the argument validates the Credibility Thesis that is once institutions persist they fulfil a function Third the collection studies development broadly construed by including the modes of production and beyond the rural and urban the developed and developing This is why it reviews property rights from China and India to Turkey Mexico and Malaysia covering issues such as customary rights and privatization mining and pastoralism dam building and irrigation but also state owned banks trade unions and notaries This book was originally published as a special issue of The Journal of Peasant Studies
