Agriculture and Eu Enlargement: Seventeenth Report of 2003-2004 Report,Together with Formal Minutes,Oral a Written Evidence Jack Michael,2004 Agriculture plays a larger role in the economies of the new Member states of the EU than it does in EU 15 There have thus been fears of the market being flooded by cheap agricultural exports and controversy about the extension of CAP payments This report therefore looks at the impact of enlargement on agriculture both in the new Member states and in the UK It concludes that structural fragmentation and the lack of capital investment mean that the new Member states are not in a position to undermine EU agricultural markets However there are concerns about the quality of inspection and food quality For the UK the Committee think that enlargement is more of a challenge than a threat especially if the government does more to help promote UK food exports and investments
