Marko Lovec

Agric Pmemo November 2013:

The European Union's Common Agricultural Policy Reforms Marko Lovec, 2016-08-02 This book engages in the controversies of the European Union's Common Agricultural Policy CAP reforms demonstrating how these are reiterated by mainstream theoretical approaches in the field. The reforms that the European Union's CAP underwent during the last three decades were intended to make it less trade distorting, more taxpayer friendly and more able to meet the new challenges of environmental concerns and rural development territorial cohesion. The outcome of the reforms has however contradicted these objectives with the controversies being reiterated by the mainstream theoretical approaches in the field. European Union's Common Agricultural Policy Reforms argues that these controversies are due to reductionist, rationalist and idealist assumptions with regard to the object of inquiry applied by mainstream approaches. It proposes an alternative critical approach that takes into account the role of real material factors. Critical realism is not just an alternative explanation of CAP reforms but an alternative theory of how explanations can be made which enables readers to reflect upon and endorse the results of existing lines of research in proceeding towards deeper level theory. **Agriculture, Price Stabilisation and Trade Rules**

Irene Musselli, 2017-07-31 In **Agriculture Price Stabilisation and Trade Rules** Irene Musselli offers a comprehensive doctrinal and historical analysis of stabilisation tools and approaches in agriculture. Using her extensive practical experience in the field, she takes up the interface of the tools discussed with trade rules and offers the first comprehensive analysis of WTO rules from the perspective of stabilisation policies. This volume offers a fresh look at the tool box of managed trade in agricultural commodities and develops new and refined solutions that take into account the legal role of equity and of graduation. Musselli offers new insights and is able to invigorate a debate caught in overly ideological entanglements between market oriented and interventionist schools. **Research Handbook on EU Agriculture Law** Joseph A. McMahon, Michael N. Cardwell, 2015-11-27 Following the conclusion of the latest round of reforms to the Common Agricultural Policy CAP in 2013, the **Research Handbook on EU Agriculture Law** provides an up to date discussion of these reforms and the changing landscape in which the CAP now operates. Adopting an interdisciplinary approach and with international contributors from across Europe and the United States, the Handbook commences with analyses of the legal instruments which implement the reformed CAP, before moving on to consider questions of land use, the role of agriculture within the wider food chain and the international dimension. In these contexts, particular issues identified include the environmental impact of past, present and future farming practices, the ability of the food chain to accommodate consumer preferences and scientific innovation, and the hurdles to be cleared before international consensus can be reached on a whole range of agricultural imperatives. As well as providing a state of the art point of reference for academics, this comprehensive book will be of great interest to students, scholars and policymakers dealing with these new challenges faced by agriculture in the EU. **2013 Global Food Policy Report** Fan, Shenggen, Polman, Paul, Kishore, Avinash, Joshi, Pramod

Pesticide Applications in Agricultural Systems Giuseppe Manetto,Emanuele Cerruto,Domenico Longo,Rita Papa,2021-08-16 The effective and efficient application of PPP in agriculture is a very complex task involving a lot of aspects ranging from active substance properties to climatic conditions from target structure to equipment features from operator awareness to the reference legislative framework Some of these aspects have been treated in the six papers collected in this Special Issue on Pesticide Applications in Agricultural Systems

The Indian Journal of Agricultural Sciences ,2014-07

Formulating development Lola Wilhelm,2025-09-02 In the 1970s Nestl became a lightning rod for criticism against the food industry s negative impacts on humans and their environment especially in the Global South But what has so far eluded historical scrutiny is that the picture was more nuanced This book tells the exclusive story of how the Swiss food giant and more broadly corporate capitalism have shaped the aid industry since the late nineteenth century It follows Nestl s bid for a share of the humanitarian market brokered by the Red Cross in wartime Europe of its clinical trials in Swiss and Senegalese maternities and of its agricultural modernisation schemes in Mexico India and the Ivory Coast Based on extensive research in the firm s own historical archives and the records of national and international aid agencies the volume interrogates the legacies of this long history for international development today

Global Agriculture and the American Farmer Kimberly Ann Elliott,2017-06-27 The United States is one of the world s largest producers and exporters of a range of agricultural commodities and the largest provider of foreign assistance so U S policies have big effects on global food security and other global public goods linked to agriculture On the positive side of the ledger President Obama created the Feed the Future aid initiative to promote agricultural development in poorer countries as a tool to achieve the global goals of ending hunger and extreme poverty which are mostly rural But that generosity is undercut by U S support for farmers that distorts global markets and ignores negative spillovers for the rest of the world In this book Elliott focuses on three policy areas that are particularly damaging for developing countries traditional agricultural subsidy and trade policies that support the incomes of American farmers at the expense of farmers elsewhere the biofuels mandate which in its current form increases market volatility while doing little if anything to mitigate climate change and weak regulation of antibiotic use

in livestock which contributes to the global spread of drug resistant super bugs While noting that broad reforms are needed to fix these problems Elliott also identifies practical steps that U S policymakers could take in the relatively short run to improve farm policies for American taxpayers and consumers as well as for the poor and vulnerable in developing countries

The Future of California Agricultural Education and the UC Cooperative Extension California. Legislature. Senate. Committee on Agriculture,2014 *Toxic Injustice* Susanna Rankin Bohme,2014-12-05 The pesticide dibromochloropropane known as DBCP was developed by the chemical companies Dow and Shell in the 1950s to target wormlike soil dwelling creatures called nematodes Despite signs that the chemical was dangerous it was widely used in U S agriculture and on Chiquita and Dole banana plantations in Central America In the late 1970s DBCP was linked to male sterility but an uneven regulatory process left many workers especially on Dole s banana farms exposed for years after health risks were known Susanna Rankin Bohme tells an intriguing multilayered history that spans fifty years highlighting the transnational reach of corporations and social justice movements Toxic Injustice links health inequalities and worker struggles as it charts how people excluded from workplace and legal protections have found ways to challenge power structures and seek justice from states and transnational corporations alike **Hansard's Parliamentary Debates** Great Britain.
