Agricultural Science June2014 Memo Grade12:

Mobile Museums Felix Driver ,Mark Nesbitt,Caroline Cornish,2021-04-19 Mobile Museums presents an argument for the importance of circulation in the study of museum collections past and present It brings together an impressive array of international scholars and curators from a wide variety of disciplines including the history of science museum anthropology and postcolonial history to consider the mobility of collections The book combines historical perspectives on the circulation of museum objects in the past with contemporary accounts of their re mobilisation notably in the context of Indigenous community engagement Contributors seek to explore processes of circulation historically in order to re examine inform and unsettle common assumptions about the way museum collections have evolved over time and through space By foregrounding questions of circulation the chapters in Mobile Museums collectively represent a fundamental shift in the understanding of the history and future uses of museum collections The book addresses a variety of different types of collection including the botanical the ethnographic the economic and the archaeological Its perspective is truly global with case studies drawn from South America West Africa Oceania Australia the United States Europe and the UK Mobile Museums helps us to understand why the mobility of museum collections was a fundamental aspect of their history and why it continues to matter today Praise for Mobile Museums This book advances a paradigm shift in studies of museums and collections A distinguished group of contributors reveal that collections are not dead assemblages The nineteenth and twentieth centuries were marked by vigorous international traffic in ethnography and natural history specimens that tell us much about colonialism travel and the history of knowledge and have implications for the remobilisation of museums in the future Nicholas Thomas University of Cambridge The first major work to examine the implications and consequences of the migration of materials from one scientific or cultural milieu to another it highlights the need for a more nuanced understanding of collections and offers insights into their potential for future re mobilisation Arthur MacGregor *The State of Conservation* Joshua Nygren,2025-01-06 In the twentieth century natural resource conservation emerged as a vital force in US politics laying the groundwork for present day sustainability Merging environmental agricultural and political history Joshua Nygren examines the political economy and ecology of agricultural conservation through the lens of the conservation industrial complex This evolving public private network which united the US Department of Agriculture Congress local and national organizations and the agricultural industry guided soil and water conservation in rural America for much of the century Contrary to the classic tales of US environmental politics and the rise and fall of the New Deal Order this book emphasizes continuity Nygren demonstrates how the conservation policies programs and partnerships of the 1930s and 1940s persisted through the age of environmentalism and how their defining traits anticipated those typically associated with late twentieth century political culture The conservation industrial complex promoted a development oriented brand of conservation that aided the rise of large scale capital intensive agriculture which continues today It also reshaped the

physical and political landscapes of the country leading to impressive conservation victories and spectacular failures by privileging some environments degrading others and intensifying farm depopulation In the name of environmental protection agricultural conservation made rural America less equal **Yearbook of International Organizations 2013-2014**

Discover Sociology William J. Chambliss, Daina S. Eglitis, 2016-12-02 Discover Sociology explores sociology as a discipline of curious minds with the theoretical conceptual and empirical tools needed to understand analyze and even change the world Organized around the four main themes of The Sociological Imagination Power and Inequality Technological Transformations of Society and Globalization every chapter in the book illuminates the social roots of diverse phenomena and institutions The Cultivator & Country Gentleman , 1877 Seed Money Bartow J. Elmore, 2021-10-12 Winner of the 2022 IACP Award for Food Issues and Matters Finalist for the 2022 George Perkins Marsh Prize Finalist for the 2022 Hagley Prize in Business History An authoritative and eye opening history that examines how Monsanto came to have outsized influence over our food system Monsanto a St Louis chemical firm that became the world s largest maker of genetically engineered seeds merged with German pharma biotech giant Bayer in 2018 but its Roundup Ready seeds introduced twenty five years ago are still reshaping the farms that feed us When researchers found trace amounts of the firm s blockbuster herbicide in

breakfast cereal bowls Monsanto faced public outcry Award winning historian Bartow J Elmore shows how the Roundup story is just one of the troubling threads of Monsanto s past many told here and woven together for the first time A company employee sitting on potentially explosive information who weighs risking everything to tell his story A town whose residents are urged to avoid their basements because Monsanto s radioactive waste laces their homes foundations Factory workers who peel off layers of their skin before accepting cash bonuses to continue dirty jobs An executive wrestling with the ethics of selling a profitable product he knew was toxic Incorporating global fieldwork interviews with company employees and untapped corporate and government records Elmore traces Monsanto s astounding evolution from a scrappy chemical startup to a global agribusiness powerhouse Monsanto used seed money derived from toxic products including PCBs and Agent Orange to build an agricultural empire promising endless bounty through its genetically engineered technology Skyrocketing sales of Monsanto s new Roundup Ready system stunned even those in the seed trade who marveled at the influx of cash and lavish incentives into their sleepy sector But as new data emerges about the Roundup system and as Bayer faces a tide of lawsuits over Monsanto products past and present Elmore s urgent history shows how our food future is still very much tethered to the company s chemical past
