Africa remains slow to grow when compared to other continents The economies of most African countries is severely anemic corruption is rife poor governance is systemic and wars conflicts famine and diseases abound Stalled economies disproportionately affects women for example as nurturers women have the extra responsibility of taking care of children and members of the extended family In times of want women are more likely to give up the little they have so that their children and others may survive This book shows the various social and legal obstacles that stall women's upward mobility and offers recommendations on how these issues can be resolved *Australian Education Index*, 1980 *American Agriculturist*
