Agricultural Sciences November 2013 Paper 2 Grade:

Cultural Hybridity and the Environment Kirsten Maclean, 2015-02-07 This book highlights the importance of diversity in overcoming issues of social and environmental degradation. It presents conceptual and practical strategies to celebrate local and Indigenous knowledge for improved community development and environmental management. David Harvey has proclaimed 'The geography we make must be a people's geography'. This clarion call challenges geographers around the world to consider the power and potential of geographic knowledge as the basis for social action, a call this book answers providing readers the theoretical and conceptual tools needed to understand the social world and empowering them to mobilize social change. The author uses empirical case studies of two environmental management and community development projects to document how knowledge generation is essentially locally situated and socially derived. In doing so, she charts a path for moving beyond what Vandana Shiva so aptly describes as monocultures of the mind. The book argues that local and Indigenous knowledge must not be seen in opposition to scientific knowledge as none of these knowledge traditions hold all the answers to localized socio-environmental problems. Rather, as the author explores through a set of processes and strategies to enable support and celebrate cultural hybridity at the local environmental governance scale, these respective knowledge systems can learn to speak to each other. Such dialogue has the potential to support more sustainable outcomes at multiple environmental governance locales. This book will be of interest to everyone involved in environmental policy planning or politics and for those who want to make this planet a more sustainable and just place. 21st Century Homestead: Sustainable Agriculture I Marlon Henkel, 2015-02-22 21st Century Homestead Sustainable Agriculture I contains the first part of everything you need to stay up to date on sustainable agriculture. 2025-26 CBSE and States Boards Class-X Social Science YCT Expert Team, 2025 26 CBSE and States Boards Class X Social Science 256 495 E This book contains the previous year solved papers from 2010 to 2023. **Sea Level Variability and Change** Ivan D. Haigh, Marta Marcos, Sönke Dangendorf, Francisco Calafat, 2017-04-27 In June 2015 we held a workshop on the beautiful island of Mallorca, Spain, with a focus on sea level variability and change. Over 120 sea level experts from around the world attended this workshop from a range of different disciplines. The main aims of the workshop were to 1 Evaluate the current state of knowledge of sea level science 2 Identify gaps and unresolved questions in any aspect of sea level science and 3 Design future research to address these issues. All aspects of sea level changes were covered from global to regional observations and modelling processes driving mean sea level changes and extremes from the geological scale to the instrumental era and future projections and including impacts on the coastal zones. This E-Book presents papers that came out of that workshop. Overall, these papers illustrate the multi-disciplinary nature of sea level research, cross-cutting many fields of research including oceanography, meteorology, geology, coastal morphodynamics, engineering and the social economic aspects. Collectively, these articles represent an interesting range of perspectives and original studies that contribute to

understanding the dynamic nature of sea level and its impacts across a wide range of time and space scales Enjoy reading them

Territorial Cohesion in Rural Europe Andrew Copus,Philomena de Lima,2014-08-13 This book reflects on how the economies social characteristics ways of life and global relationships of rural areas of Europe have changed in recent years This reveals a need to refresh the concepts we use to understand measure and describe rural communities and their development potential This book argues that Europe has outgrown many of the stereotypes usually associated with it with substantial implications for European Rural Policy Rural structural change and its evolving geography are portrayed through regional typologies and the concept of the New Rural Economy Demographic change migration business networks and agricultural restructuring are each explored in greater detail Implications for equality and social exclusion and recent developments in the field of governance are also considered Despite being a subject of active debate interventions in the fields of rural and regional development have failed to adapt to changing realities and have become increasingly polarized This book argues that rural regional policy needs to evolve in order to address the current complex reality partially reformulating territorial or place based approaches and the New Rural Paradigm following a set of principles termed Rural Cohesion Policy
