Software Reuse Techniques Carma L. McClure, 1997 McClure takes software reuse beyond good intentions by presenting specific reuse techniques that have repeatedly helped companies lower costs and improve quality **Formatting & Document Processing Essentials** Susie H. VanHuss, Donna Woo, 2005 Formatting Document Processing Essentials Lessons 61-120 focuses on mastery of formatting letters, memos, reports and business documents using the function of Word 2002 or 2003. Additional skillbuilding is included to increase keyboarding speed and accuracy. Word processing skills are isolated and introduced prior to document formatting lessons while proofreading skills are reinforced within the documents. The document formatting lessons are devoted solely to documents and teach no additional word processing so users can focus on formatting mastery. *Information Technology Applications in Industry, Computer Engineering and Materials Science* S.Z. Here the reader will find a genuinely object oriented complete detailed model of the whole process involved in developing both object oriented and hybrid systems. The model may be used in conjunction with any object oriented method or notation such as Coad, Firesmith, Odell, SOMA or UML. This book shows how to use the OPEN process to organize, plan and manage both large and small scale object oriented software development projects. The framework for the OPEN process consists of interconnecting activities which are represented as objects whose methods are the tasks needing to be accomplished. This model provides a strategy that enables professional software developers, project managers and students of software engineering to approach all kinds of software development projects and succeed in achieving timely delivery and high quality products. As well as an in depth description of the important activities associated with a project and comprehensive coverage of the kinds of tasks which need to be achieved for different projects this book also contains an extensive reference section containing a detailed description of each task recommended techniques that provide support for accomplishing each task a summary of the COMN Light Notation a foreword by Ed Yourdon About the authors Ian Graham is an internationally recognized authority on Object Technology and is the developer of the SOMA object oriented method which was the chief source for the OPEN process object model.
