Book Awards Finalist for the J Anthony Lukas Book Prize From the front lines of the fracking debate a field philosopher explores one of our most divisive technologies When philosophy professor Adam Briggie moved to Denton Texas he had never heard of fracking Only five years later he would successfully lead a citizens initiative to ban hydraulic fracturing in Denton the first Texas town to challenge the oil and gas industry On his journey to learn about fracking and its effects he leaped from the ivory tower into the fray In beautifully narrated chapters Briggie brings us to town hall debates and neighborhood meetings where citizens wrestle with issues few fully understand Is fracking safe How does it affect the local economy Why are bakeries prohibited in neighborhoods while gas wells are permitted next to playgrounds In his quest for answers Briggie meets people like Cathy McMullen Her neighbors cows asphyxiated after drinking fracking fluids and her orchard was razed to make way for a pipeline Cathy did not consent to drilling but those who profited lived far out of harm s way Briggie s first instinct was to think about fracking deeply Drawing on philosophers from Socrates to Kant but also on conversations with engineers legislators and industry representatives he develops a simple theory to evaluate fracking we should give those at risk to harm a stake in the decisions we make and we should monitor for and correct any problems that arise Finding this regulatory process short circuited with government and industry alike turning a blind eye to symptoms like earthquakes and nosebleeds Briggie decides to take action Though our field philosopher is initially out of his element joining fierce activists like Texas Sharon once called the worst enemy of the oil and gas industry his story culminates in an underdog victory for Denton now nationally recognized as a beacon for citizens rights at the epicenter of the fracking revolution

Environmental Performance Reviews United Nations Publications,2017 Environmental Performance Review Tajikistan

On China's Military Rise Ming-Hsien Wong,2015-04-01 Since the 21st century China s rise has become a fact and People s Liberation Army has developed rather quickly Thusso called China s military rise has become the most challenging phenomenon in world politics Regarding to its army building and readiness many studies have shown that the People s Liberation Army in 2020 will form a complete antiaccess area denial capabilities capable enough to turn China into a great military power in Asia Pacific It will have an impact on the Asia Pacific regional stability the cross strait military balance and under United States re balance strategy Under China s military threat Taiwan must be innovative in terms of strategic thinking and concept Indian National Bibliography B. S. Kesavan,2016 The Water, Energy and Food Security Nexus in the Arab Region United Nations Publications,2015 The Arab countries have much to gain from considering the linkages between water energy and food security in their pursuit of sustainable development given the stressors constraints and strong interdependencies that characterize the relationships between these three sectors in the region The nexus analytical framework can be applied at various scales of analysis and can accommodate consideration of the varying natural resources endowments and different production and consumption patterns that exist among Arab countries It can facilitate the examination of the complex challenges that stymie water energy and food security in the Arab region such as shared water

resources management decision making related to the energy mix and energy efficiency in Arab countries and national efforts to achieve food security in face of water scarcity land degradation and development objectives This sixth issue of the ESCWA Water Development Report presents an analytical framework and a series of case studies for understanding the water energy food security nexus in the Arab region The analytical framework considers the linkages that affect the achievement of water energy and food security through the lens of sustainable development and the achievement of the 2030 Sustainable Development Goals with a view to mitigating climate change and ensuring access to food water and sustainable energy for all in the context of a human rights approach Publisher s description *Canadian Journal of Forest Research* ,2014-10 *Global Waste Management Outlook* David Curran Wilson,2015 The UNEP Governing Council of February 2013 requested the United Nations Environment Programme to develop a global outlook of challenges trends and policies in relation to waste prevention minimization and management taking into account the materials life cycle subject to the availability of extra budgetary resources and in consultation with Governments and stakeholders building on available data best practices and success stories taking into account the Global Chemicals Outlook and any other relevant initiatives and taking care not to duplicate existing information to provide guidance for national policy planning UNEP s International Environmental Technology Centre IETC in collaboration with the International Solid Waste Association ISWA has taken the lead on this initiative aiming to develop the Global Waste Management Outlook as a tool to provide an authoritative overview analysis and recommendations for action of policy instruments and financing models for waste management The GWMO is the result of two year s work and provides the first comprehensive global overview of the state of waste management around the world in the 21st century **Conference Proceedings** ,2002 **Publishers' Circular and Booksellers' Record of British and Foreign Literature** ,1890 Annual Index/abstracts of Sae Technical Papers, 2000 Society Of Automotive Engineers,2001 *AEROTECH V: Progressive Aerospace Research* Renuganth Varatharajoo,Fairuz I.
