2015 2016 Intake:

Geriatric Medicine Michael R. Wasserman,Debra Bakerjian,Sunny Linnebur,Sharon Brangman,Matteo Cesari,Sonja Rosen,2024-02-19 Both volumes sold as a combined set for a one time purchase Older adults represent the most rapidly growing demographic in the U S and in many developed countries around the world The field of geriatric medicine is still relatively young and is only recently seeing a significant increase in peer reviewed literature Medicare and Medicaid expenditures related to older adults are nearly a trillion dollars year in the US How our healthcare system cares for older adults and how those older adults navigate an increasingly complex system is of the utmost importance According to the Institute of Medicine physicians and other healthcare professionals receive an inadequate amount of training in geriatric medicine Geriatric medicine is based on the concept of delivering person centered care with a focus on function and quality of life It is essential that physicians nurse practitioners physician assistants pharmacists social workers and other health care professionals all be knowledgeable about thegeriatric approach to care Geriatric medicine varies from most other fields in medicine While many specialties function on the basis of evidence based literature geriatricians and other clinicians caring for older adults must integrate relatively limited evidence with variable physiological changes and complex psychosocial determinants Geriatricians are used to caring for 90 year olds with multiple chronic illnesses Their variable physiology leads to uncertain responses to pharmacotherapy and their personal goals and wishes need to be incorporated into any plan of care Practicing geriatric medicine requires the ability to see patterns But it goes one step further as the rules are constantly in flux Every patient is an individual with particular needs and goals In order to provide true person centered care to older adults one has to incorporate these factors into the decision making process The proposed handbookis designed to present a comprehensive and state of the art update that incorporates existing literature with clinical experience Basic science and the physiology of aging create a background but are not the main focus This is because every chapter has been written through the lens of person centered care This book is about focusing on what matters to the person and how that is not always about pathology and physiology The reader generally will not find simple solutions to symptoms diseases and syndromes In fact the key to caring for geriatric patients is the ability to think both critically and divergently at the same time Geriatrics encompasses multiple disciplines and spans all of the subspecialties It requires knowledge of working within an interdisciplinary team It requires an appreciation of how quality of life varies with each individual and creates treatment and care plans that also vary And most of all it requires a firm commitment to first learning who the person is so that all of the necessary data can be analyzed and integrated into a true person centered plan of care This book aims to serve as an unparalleled resource for meeting these challenges Updated and revised from the previous edition this text features over 40 new peer reviewed chapters new references and a wide array of useful new tools that are updated on a regular basis by interdisciplinary and interprofessional experts in geriatric medicine

and Browning Phenomenon Rita De Matteis,Paula Oliver,Assunta Lombardi,2020-04-20 **Gaps and Actions in Health**

Improvement from Hong Kong and Beyond Ben Yuk Fai Fong,William Chi Wai Wong,2023-09-13 This book provides a timely review on what has been accomplished and what remains amiss following the World Health Organization's 1978 Health for All campaign by identifying enduring gaps in health care within a global context. The WHO declaration of Health for All by the Year 2000 mapped out a road towards primary health care for all people and demarcated it as essential for human progress in terms of economic development and social justice. However 45 years have gone by and most societies and countries have yet achieved health for all despite so much having changed in technology, disease patterns and population demographics. In promoting community health and improving service delivery the book advocates the development and implementation of All For Health strategies to steer stakeholders in the right direction towards universal health care. The book covers the gaps and actions in health improvements the All For Health strategies and the Health in All Policies HiAP reviewing and discussing issues through both Asian and international examples. Contributors include both academics and practitioners from diverse professional backgrounds including medicine, nursing, pharmacy, allied health, dietetics, social sciences, life sciences, education, business, administration, law and public policy. Essential to scholars in public health and related disciplines this book is also useful to policymakers, community and public health practitioners and health care executives and interns.

Veteran Ford writer and historian Jim Smart explains and highlights all of the latest and greatest options to achieve more horsepower and torque and of course faster quarter mile times in Ford Coyote Engines. How to Build Max Performance Revised Edition In this Revised Edition now covering Generation III engines as well as Generation I it was an evolution of the earlier 4.6L and 5.4L Modular designs.
