2015 5th Grade Common Core Math Pacing Guide:

The SAGE Guide to Curriculum in Education Ming Fang He, Brian D. Schultz, William H. Schubert, 2015-06-05 The SAGE Guide to Curriculum in Education integrates summarizes and explains in highly accessible form foundational knowledge and information about the field of curriculum with brief simply written overviews for people outside of or new to the field of education. This Guide supports study research and instruction with content that permits quick access to basic information accompanied by references to more in depth presentations in other published sources. This Guide lies between the sophistication of a handbook and the brevity of an encyclopedia. It addresses the ties between and controversies over public debate policy making university scholarship and school practice. While tracing complex traditions, trajectories and evolutions of curriculum scholarship, the Guide illuminates how curriculum ideas, issues, perspectives and possibilities can be translated into public debate school practice, policy making and life of the general public focusing on the aims of education for a better human condition. 55 topical chapters are organized into four parts: Subject Matter as Curriculum, Teachers as Curriculum, Students as Curriculum and Milieu as Curriculum, based upon the conceptualization of curriculum commonplaces by Joseph J. Schwab. Subject matter teachers, learners and milieu. The Guide highlights and explicates how the four commonplaces are interdependent and interconnected in the decision making processes that involve local and state school boards and government agencies, educational institutions and curriculum stakeholders at all levels that address the central curriculum questions: What is worthwhile? What is worth knowing? Needing? Experiencing? Doing? Being? Becoming? Overcoming? Sharing? Contributing? Wondering? and Imagining? The Guide benefits undergraduate and graduate students, curriculum professors, teachers, teacher educators, parents, educational leaders, policy makers, media writers, public intellectuals and other educational workers. Key Features: Each chapter inspires readers to understand why the particular topic is a cutting edge curriculum topic; what are the pressing issues and contemporary concerns about the topic; what historical, social, political, economic, geographical, cultural, linguistic, ecological, etc. contexts surrounding the topic area; how the topic relevant practical and policy ramifications and contextual embodiment can be understood by theoretical perspectives; and how forms of inquiry and modes of representation or expression in the topic area are crucial to develop understanding for and make impact on practice, policy, context and theory. Further readings and resources are provided for readers to explore topics in more details.

Transform Your Math Class Using Asset-Based Teaching for Grades 6-12 Michael D. Steele, Joleigh Honey, 2024-07-19 Foster a love of mathematics by creating a more inclusive and empowering learning environment through asset based teaching. An asset based perspective on math education means starting with what students already know instead of focusing on what's missing. This approach elevates student thinking and reasoning skills. In this way, educators acknowledge that all students bring prior experiences, strengths, talents, and resources to the learning process and can contribute meaningfully in an authentic learning environment. *Transform Your Math Class Using Asset Based Teaching for*

Grades 6-12 provides insight into asset based perspectives in mathematics education to create an environment where all students feel valued and capable of being doers of mathematics. In the book *Michael Steele and Joleigh Honey* highlight the importance of using language instructional routines and systemic structure that positively impact student engagement, their math identity and ultimately their outcomes. Providing a wealth of knowledge and practical strategies that can be used to transform math classrooms into inclusive, supportive and empowering learning environments, this book introduces an asset based perspective that focuses on students' strengths, assets and potential to learn mathematics. Includes a variety of frameworks and tools that teachers can use to build and grow their sense of asset based perspectives. Offers strategies for promoting a growth mindset in mathematics, encouraging productive struggle in math and promoting equitable math instruction. Supports teachers in reflecting on their decisions, self awareness and self management. Includes a companion online study guide to support teachers individually or as part of a professional learning community. Adopting asset based perspectives is about movement over time, not about flipping a switch. This book paves the path for an asset based journey that ultimately helps to transform our math classrooms and advance all students' learning and development.

Artificial Intelligence in STEM Education *Fan Ouyang, Pengcheng Jiao, Bruce M. McLaren, Amir H. Alavi*, 2022-12-29. Artificial intelligence AI opens new opportunities for STEM education in K-12, higher education and professional education contexts. This book summarizes AI in education (AIED) with a particular focus on the research, practice and technological paradigmatic shifts of AIED in recent years. The 23 chapters in this edited collection track the paradigmatic shifts of AIED in STEM education, discussing how and why the paradigms have shifted, explaining how and in what ways AI techniques have ensured the shifts and envisioning what directions next generation AIED is heading in the new era. As a whole, the book illuminates the main paradigms of AI in STEM education, summarizes the AI enhanced techniques and applications used to enable the paradigms and discusses AI enhanced teaching, learning and design in STEM education. It provides an adapted educational policy so that practitioners can better facilitate the application of AI in STEM education. This book is a must-read for researchers, educators, students, designers and engineers who are interested in the opportunities and challenges of AI in STEM education.
