Standards Database Maintenance Phase II Albert W. Horsmon,1997 The objective of the standards database projects has been to develop and maintain a compendium of standards from international national government and regulatory bodies that have relevance to the U S shipbuilding and repair industry The first project in the current series was reported as NSRP 0361 It had standards titles numbers and issuing organizations cross referenced by Ship Work Breakdown Structure SWBS numbers The second was NSRP 0456 and was intended as a follow on to NSRP 0361 but the timing was such that 0456 was essentially a new database index This report is another new database index of shipbuilding related standards It is an expanded and updated version of 0456 with over 37 000 up from 17 000 standards listed This database should provide shipyards and related marine industries with a ready reference to standards that are of use to shipbuilding and avoid the development of new standards where acceptable standards exist
