**Piston Aero-engines of World War II** Victor F. Bingham, 1998 The frenzy of technological invention and improvement that  
accompanied each large scale conflict during the twentieth century has been one of the most important factors in driving the  
spectacular scientific advances made during the last hundred years The half way point of the century saw the horrors of the  
first truly global battle World War II At that time the piston aero engine was at its zenith and the world s airforces were  
almost entirely propeller driven It is a period that provides the most interesting study of these engines and the aircraft they  
powered because the rapid change to turbojets that occurred in the post war era saw the demise of the piston engine on  
almost all types of military aircraft and large airliners This book looks at the design and development of the most famous  
engines used by the combatants during this great air war Each type is studied and evaluated in historical perspective and  
many famous aircraft are illustrated to demonstrate installation and differing usage One Merlin makes a Spitfire two a  
Mosquito and four a Lancaster Engines made in America Russia and Germany could boast the same versatility and are  
described here in detail Book jacket     **Flying** ,1992     The Bookseller ,1950
