

**Objectivity: An Introduction**

Students demonstrate an understanding of engineering problem-solving techniques simply from the knowledge already provided by learning the principles of thermodynamics. The key to understanding the introduction of design is to present the primary responsibility of an engineer. The typical engineering culture is to design, and it is this design process that gives the students the specific creative path. Students often have a preconception of design as being separate from the rest of the course or as being a final stage, and it is important to show them that design is a continuous process of development. The goal is to show that engineering is a continuous process of development, and that the design process is a continuous process of development. The goal is to show that engineering is a continuous process of development, and that the design process is a continuous process of development.

The next objective is to demonstrate the design process. The design process is a continuous process of development, and it is this design process that gives the students the specific creative path.
