

Answer all the questions.

Each question is followed by four options lettered A to D. Find the correct option for each question and shade in pencil on your answer sheet, the answer space which bears the same letter as the option you have chosen. Give only one answer to each question.

An example is given below.

The societal value which members are expected to uphold in order to ensure development is

- A. title.
- B. integrity.
- C. apathy.
- D. compromise.

The correct answer is integrity, which is lettered B and therefore answer space B would be shaded.

[A]

[C]

[D]

Think carefully before you shade the answer spaces; erase completely any answer(s) you wish to change

Now answer the following questions.

1. Fundamental rights are literally the rights that one can enjoy because one is

Conscious Mind, Resonant Brain Stephen Grossberg, 2021 How does your mind work How does your brain give rise to your mind These are questions that all of us have wondered about at some point in our lives if only because everything that we know is experienced in our minds They are also very hard questions to answer After all how can a mind understand itself How can you understand something as complex as the tool that is being used to understand it This book provides an introductory and self contained description of some of the exciting answers to these questions that modern theories of mind and brain have recently proposed Stephen Grossberg is broadly acknowledged to be the most important pioneer and current research leader who has for the past 50 years modelled how brains give rise to minds notably how neural circuits in multiple brain regions interact together to generate psychological functions This research has led to a unified understanding of how where and why our brains can consciously see hear feel and know about the world and effectively plan and act within it The work embodies revolutionary Principia of Mind that clarify how autonomous adaptive intelligence is achieved It provides mechanistic explanations of multiple mental disorders including symptoms of Alzheimer's disease autism amnesia and sleep disorders biological bases of morality and religion including why our brains are biased towards the good so that values are not purely relative perplexing aspects of the human condition including why many decisions are irrational and self defeating despite evolution's selection of adaptive behaviors and solutions to large scale problems in machine learning technology and Artificial Intelligence that provide a blueprint for autonomously intelligent algorithms and robots Because brains embody a universal developmental code unifying insights also emerge about shared laws that are found in all living cellular tissues from the most primitive to the most advanced notably how the laws governing

networks of interacting cells support developmental and learning processes in all species The fundamental brain design principles of complementarity uncertainty and resonance that Grossberg has discovered also reflect laws of the physical world with which our brains ceaselessly interact and which enable our brains to incrementally learn to understand those laws thereby enabling humans to understand the world scientifically Accessibly written and lavishly illustrated Conscious Mind Resonant Brain is the magnum opus of one of the most influential scientists of the past 50 years and will appeal to a broad readership across the sciences and humanities Action effects in perception and action: The Ideomotor Approach Roland Pfister, **Theory of Constraints Handbook** James F. Psychology Cognition grade 1 3 University of Hamburg Kognitionspsychologie language English abstract Individuals differ in their tendency to shift towards habitual behavior after stress Mindfulness is an individual characteristic that does not only influence the stress response but also cognitive processes Therefore effects of trait mindfulness on the balance between goal directed and habitual behavior after a stress induction were investigated During this study forty seven healthy male and female participants mainly without meditation experience were exposed to either a laboratory acute stress induction or a control procedure before they performed in a two staged instrumental learning paradigm and completed a mindfulness questionnaire Participants learned the acquired discriminations and a congruence effect as predicted was found Moreover explicit knowledge was highly indicative of level of goal directedness The stress manipulation was successful Stressed individuals did not shift more towards habits Mindfulness did not predict the level of goal directedness neither did it affect stress responses Future studies might incorporate a mindfulness intervention or compare differently experienced meditators This could help to approve mindfulness as a potential intervention to reduce cognitive shifts towards habits which play a major role in development of pathological behavior *Library Literature & Information Science* ,2009 An index to library and information science literature

Understanding the influence of goal-structure on the disbandment of terrorist groups Johannes Wander,2016-09-28 Master s Thesis from the year 2016 in the subject Politics Topic Peace and Conflict Security grade 1 0 Uppsala University Department of Peace and Conflict Research language English abstract Very little is known about the circumstances that lead a terrorist group to cease their operations in one way rather than another This study seeks to answer the question what impact the goal structure of a terrorist group has on their disbandment A new framework describes the structure of goals by differentiating operative and official goals of terrorist groups along their geographical scope their final goal s extent and the respective effectiveness this is accomplished by I argue that strategic or abstract goal structures determine the way a terrorist organisation ends By applying a multinomial logistic regression model with a novel dataset on 155 groups goal structures I show that a more strategic goal structure increases the likelihood of splintering and victory while an abstract goal structure increases the likelihood of defeat by police or military force whilst also leading terrorist groups to join non violent political participation *The Macroeconomics of de-growth - Can a de-growth strategy be stable?* Dina Padalkina,2012-03-27 Master s Thesis from the year 2012 in the subject Economics Macro economics general grade excellent Berlin School of Economics and Law language English abstract This paper examines an alternative strategy for sustainability and economic development based on de growth assumptions This concept is proposed by ecological economists who consider there to be a natural limitation on economic growth imposed by necessary environmental regulation Moreover they oppose the neoclassical ideas which are considered as pro growth theories arguing that economic growth itself does not contribute to the social and economic development therefore it should not be sustained Accepting this proposition the author makes an attempt to verify the feasibility of a de growth strategy for macroeconomic

stability applying a post Keynesian methodology for analysis The Kaleckian model is used as the basic approach to derive the model restrictions for the de growth strategy that maintains macroeconomic stability The findings of this paper will provide policy recommendations to sustain macroeconomic stability while taking full account of the degrowth assumptions
