## Answers In Genesis Science:

**The New Answers Book 1** Ken Ham, 2007-01-15 Christians live in a culture with more questions than ever questions that affect one's acceptance of the Bible as authoritative and trustworthy. Now discover easy to understand answers that reach core truths of the Christian faith and apply the biblical worldview to a wide variety of subjects. [Reading the Bible with Its Writers](#) Stephen Burnhope, 2025-02-28 The Bible is a collection of sixty six books written by many different people over many hundreds of years. All of its writers lived in an ancient world context and thought in ancient world ways. But as Bible readers today we live and think in the modern world which is increasingly a postmodern world. Things that were obvious to them are not obvious to us and vice versa. For Christians who want to be faithful to the Bible as the Word of God the time and distance between then and now is a real challenge to navigate. Stephen Burnhope suggests that we won't get it right by collapsing that gap by just picking the text up and reading it. The Bible says insert a verse is not enough. We will mishear both what the human authors were saying and what the divine author was saying. Reading the Bible well starts from reading it with its writers understanding it as they understood it what they were saying why they said it and how they said it. All of which is shaped and framed by the Bible's big themes that once we're aware of them we see running throughout from cover to cover.

It began in the 1960s as a fundamentalist Christian effort in the United States to prove Biblical inerrancy and nullify the scientific evidence for evolution. It has since developed a sizable religious following in the United States with creation science ministries branching worldwide. The main ideas in creation science are the belief in creation ex nihilo Latin out of nothing the conviction that the Earth was created within the last 6 000 years the belief that mankind and other life on Earth were created as distinct fixed baraminological kinds and the idea that fossils found in geological strata were deposited during a cataclysmic flood which completely covered the entire Earth. As a result creation science also challenges the commonly accepted geologic and astrophysical theories for the age and origins of the Earth and Universe which creation scientists acknowledge are irreconcilable to the account in the Book of Genesis.
