Architectural Research Tomasz E. Malec, 2025-08-02 This book introduces the basic principles and methods of scientific research in architecture. Due to the specificity of the creative process and the architectural industry, the presented issues have also been adapted to the needs of architecture teachers, architects active in the design market, and others interested in the topic. The first chapter explains four crucial research skills: focus, reasoning, critical thinking, and creativity supported by ethics. The second chapter focuses on preparation for research by formulation of the research problem, hypothesis, and correlated research questions. The third chapter is an introductory part presenting the various classifications of architectural research and explaining the roots and significance of reasoning, creativity, and ethics. The fourth chapter presents the main research methods applicable to architecture, starting with the literature review. All of them can be modified and adjusted to ever-changing requirements. In the fifth chapter, visual tools are described for clearly presenting the research related issues. The sixth chapter is the introduction to academic writing. It includes the main rules of article preparation using elements such as abstract, keywords, introduction, materials and methods, results, and discussion, conclusions, references, and the application of citation styles. Additionally, this chapter is concerned with general requirements for critical review preparation.

Software Architecture Ronald Morrison, Dharini Balasubramaniam, Katrina Falkner, 2008-09-12 This book constitutes the refereed proceedings of the Second European Conference on Software Architecture (ECSA 2008) held in Paphos, Cyprus, in September/October 2008. The 12 revised full papers presented together with 2 keynote abstracts, 4 experience papers, 7 emerging research papers, and 12 research challenge poster papers were carefully reviewed and selected from 83 submissions. The papers focus on formalisms, technologies, and processes for describing, verifying, validating, transforming, building, and evolving software systems. Topics include architecture modeling, architecture description languages, architectural aspects, architecture analysis, transformation, and synthesis, architecture evolution, quality attributes, model-driven engineering, built-in testing, and architecture-based support for component-based and service-oriented systems. Guide to Socially-Informed Research for Architects and Designers Michelle Janning, 2022-12-09 This book offers an efficient set of step-by-step tips and overarching lessons about how to gather useful, meaningful, and socially informed data about clients and other stakeholders' experiences in architecture and interior design professions. In this guide, author Michelle Janning helps the design professional conduct ongoing evaluation of design projects, create useful pre and post design evaluations, frame effective questions for improved future design, involve various stakeholders in the research process, and focus on responsible and evidence-based human-centered design to improve the relationship between design and people's experiences. Examining a variety of both large and small scale project examples from different institutional realms, including healthcare sites, schools, residences, eating establishments, museums, and theaters, this book highlights not only the overlap in these types of projects but also the differences between project sizes that may impact the methods used in any given project.

It also offers tools for how to communicate design success to audiences that include potential clients occupants and other designers A Guide to Socially Informed Research for Architects and Designers is a go to reference for design professionals interested in using accessible social scientific methods to gather essential and practical information from people who occupy the spaces they design and to do so in an ethical inclusive and socially informed way in order to enhance social sustainability in the built environment
