Vehicle Compatibility in Automotive Crashes Stanley H Backaitis,2005-03-29 For years reducing the number of traffic
related fatalities and injuries has been a major problem throughout the world Today it has gained much more momentum in
view of rapidly increasing SUV van and light truck populations relative to the number of passenger cars and due to
significant improvements in technologies that facilitate a better understanding of the interaction dynamics among widely
differing size vehicles Unless disparities in crashworthiness among vehicles of different masses sizes and structural
characteristics in mixed crash environments are successfully taken into account the challenge toward improved vehicle
safety will continue This two part compendium provides the most comprehensive information available on the entire
spectrum of vehicle crash compatibility The first part presents oral comments captured from the 2003 SAE World Congress
panel discussion on compatibility The panel of leading experts representing industry academia and government provides a
rough framework and a broad range of views on current and emerging developments in compatibility research The second

part of this compendium features 44 best technical papers from SAE International and the International Technical Conference on the Enhanced Safety of Vehicles published from the early 1970s through 2004 Readers will get a feel for the direction passenger car and heavy vehicle manufacturers research institutions infrastructure suppliers insurers and governments are taking to reduce the number of traffic fatalities and injuries

Air Bag Development and Performance

Richard W Kent,2003-03-03 Follow the fascinating development of the automotive air bag from its introduction to the latest advances in this comprehensive collection of papers from both SAE and other professional sources complete with informative diagrams graphics and charts Air Bag Development and Performance New Perspectives from Industry Government and Academia begins with five chapters one each from Editor Richard Kent and the collection s four Associate Editors offering the authors unique perspectives on the history development or performance of these important safety devices Approximately 50 selected SAE government and other papers are also provided in their entirety along with the titles and abstracts of about 90 other papers listed as recommended reading and the titles of some 600 related papers for further reference included in a bibliography at the end of the book
