## 7 Level Threshold Ks1:

**Third validation compendium report** Great Britain: National Audit Office, 2006-12-19 In 2004 the Government announced 110 Public Service Agreement PSA targets for 17 Departments covering the period 2005-08. PSA targets express the priority outcomes that Departments are seeking to achieve nationally and internationally and cover key aspects of the Government's social, economic and environmental policy. Large sums of public money are devoted to the programmes designed to deliver them. This NAO report contains the detailed results of its examination of the data systems used by six government departments to monitor and report progress against their 2005-08 PSA targets, covering a total of 65 data systems. The six Departments are the Cabinet Office, the Department for Culture, Media and Sport, the Department for Education and Skills, the Department for the Environment, Food and Rural Affairs, the Ministry of Defence and HM Treasury. Findings include that 75 per cent of the data systems used are broadly appropriate but less than half of these were fully fit for purpose. Most required some action to strengthen measurement or reporting arrangements. A companion volume HCP 127 (I session 2006-07, ISBN 0102944040) is available separately, which contains the NAO's summarised findings. *Using Effectiveness Data for School Improvement* Anthony Kelly, Christopher Downey, 2010-12-13. This book lifts the lid on a range of data gathering techniques and methods and reveals the provenance and shortcomings of education data collection and utilisation.

**Making Every Lesson Count** Shaun Allison, Andy Tharby, 2015-06-11. Packed with practical teaching strategies, *Making Every Lesson Count* bridges the gap between research findings and classroom practice. Shaun Allison and Andy Tharby examine the evidence behind what makes great teaching and explore how to implement this in the classroom to make a difference to learning. They distil teaching and learning down into six core principles, challenge explanation, modelling, practice, feedback and questioning, and show how these can inspire an ethos of excellence and growth not only in individual classrooms but across a whole school too. Combining robust evidence from a range of fields with the practical wisdom of experienced effective classroom teachers, the book is a complete toolkit of strategies that teachers can use every lesson to make that lesson count. There are no gimmicky ideas here just high impact focused teaching that results in great learning every lesson every day. To demonstrate how attainable this is, the book contains a number of case studies from a number of professionals who are successfully embedding a culture of excellence and growth in their schools. *Making Every Lesson Count* offers an evidence informed alternative to restrictive Ofsted driven definitions of great teaching, empowering teachers to deliver great lessons and celebrate high quality practice. Suitable for all teachers, including trainee teachers, NQTs and experienced teachers who want quick and easy ways to enhance their practice and make every lesson count. Educational Book Award winner 2016. Judges' comments: 'A highly practical and interesting resource with loads of information and uses to support and inspire teachers of all levels of experience. An essential staffroom book.'

Select Committee on Science and Technology,2009 This report HCP 44 session 2009 10 ISBN 9780215542663 from the Science and Technology Committee looks at literacy programmes evidence check and concludes that expectations by the Department for Children Schools and Families of the quality of the evidence base for reading programmes are worryingly low It urges the Government to commission randomised controlled trials RCTs The Committee also states it is particularly concerned about the quality of evidence demonstrating cost effectiveness of different programmes and further recommends that the Government reviews its guidelines on RCT design it says even Wikipedia is more thorough and informative The Committee also concludes that the Government s focus on early literacy interventions and phonics based teaching is based on the best available evidence the use of Reading Recovery is based on a lower quality of evidence than the Committee is comfortable with and that the decision to introduce Reading Recovery nationally is not evidence based The Committee further expressed alarm that there was a complete lack of randomised controlled trials using standardised test scores for the Reading Recovery programme in the UK school system before national implementation of the programme [Parliamentary Debates \(Hansard\)](#).
