**Inside Xinjiang** Anna Hayes, Michael Clarke, 2015-12-14 The Xinjiang Uyghur Autonomous Region is China's largest province shares borders with Kazakhstan, Kyrgyzstan, Tajikistan, Afghanistan, Pakistan, Russia, and Mongolia and possesses a variety of natural resources including oil. The tensions between ethnic Muslim Uyghurs and the growing number of Han Chinese in Xinjiang have recently increased, occasionally breaking out into violence. At the same time as being a potential troublespot for China, the province is of increasing strategic significance as China's gateway to Central Asia whose natural resources are of increasing importance to China. This book focuses in particular on what life is like in Xinjiang for the diverse population that lives there. It offers important insights into the social, economic and political terrains of Xinjiang, concentrating especially on how current trends in Xinjiang are likely to develop in the future. In doing so it provides a broader understanding of the region and its peoples.

**Pedagogical Psychology: Beyond the 21st Century** Gretchen M. Reevy, Stanley N. Bursten, 2015-07-22 *Frontiers in Psychology* is introducing a new research topic, Pedagogical Psychology Beyond the 21st Century, which will be released as an online journal issue in summer 2014. The purpose of Beyond the 21st Century will be to publish goal oriented articles leading to improvement of teaching and learning at all levels of psychology education. Until perhaps 20 years ago, educational approaches to teaching were largely informed by a Stand and Deliver pedagogical attitude. The psychology of this approach has often invested unrealistic and unrealizable responsibilities in both teachers and students. With the emergence of electronic data sharing (e.g., the Internet) and global cooperation/competition, newer approaches to teaching have begun to supplement and sometimes replace the older model of teaching. These newer approaches have simultaneously taken advantage of technological advances, global changes, and an evolving understanding of successful student/mentor relationships. As the pedagogical models driven by these changes evolve into the 22nd century and beyond, what seems groundbreaking today will in hindsight be seen as hidebound. Thus, the major goal of Beyond the 21st Century will be to publish manuscripts which imaginatively but realistically anticipate future trends in teaching undergraduate psychology. Types of manuscripts which are appropriate for Pedagogical Psychology should be visionary yet empirically and/or theoretically based. We welcome manuscripts in all domains of pedagogical psychology with a special interest on topics that are new or expected to evolve rapidly. Such innovative topics include, but are not limited to: Online and hybrid teaching; Massive Open Online Courses (MOOCs); How has student success improved with the introduction of online distance education? Are there dangers associated with online distance education, especially MOOCs? How can student success be improved as technology evolves beyond the MOOC concept? What technological advances will make psychology education available and useful for more and more diverse students? How can the physical classroom be transformed into a student-centered, effective virtual environment? Using the internet as resources for classes (e.g., stat tutorials, etc.) Uses of technology

such as social media e g Facebook Twitter wikis and clickers in the classroom The challenge of teaching particular courses online such as psychology laboratory courses or practicums Seeking effective user feedback i e regarding user friendliness teaching effectiveness for online courses including MOOCs The Wikipedia initiative of the Association for Psychological Science Teaching Generation Me anticipating changing generational needs Teaching international students Teaching non traditional age students Undergraduate research projects Integrating multiculturalism into all courses Infusing social justice issues into psychology courses Creating opportunities for interdisciplinary learning Teaching techniques for psychology courses which are often offered as electives rather than core curriculum e g evolutionary psychology psychology and the law cross cultural psychology health psychology positive psychology Assessing institutional student learning objectives across the curriculum Contingent faculty adjunct faculty lecturers in psychology departments Working with changing legislative accreditation constraints and unpredictable budgets Co Hosts of Pedagog

**Predictive HR Analytics** Kirsten Edwards,Dr Martin R. Edwards,2016-03-03 Where other functions of an organization deal in profits sales growth forecasts and strategic planning the HR function is responsible for employee well being engagement and motivation Such concerns do not immediately conjure up images of analytical know how despite the fact that in reality the management of such things often requires a lot of measurement and technical skill Predictive HR Analytics provides a clear accessible framework with which to understand and work with HR analytics at an advanced level taking HR professionals through examples of particular predictive models so they can develop effective HR strategies based on evidence Predictive HR Analytics will show step by step using simple terms how to carry out analysis using the statistical package SPSS and interpret the results helping to communicate the potential of HR analytics and get the most out of the HR function whether carrying out the analysis or briefing external consultants The book will help deliver a credible and reliable service to businesses by providing metrics on which executives will be able to make sound business decisions Online supporting resources include data sets for using alongside the book
