[Business Data Communications and Networking](#) Jerry FitzGerald, Alan Dennis, Alexandra Durcikova, 2020-12-03 Business Data Communications and Networking 14th Edition presents a classroom tested approach to the subject combining foundational concepts practical exercises and real world case studies. The text provides a balanced well rounded presentation of data communications while highlighting its importance to nearly every aspect of modern business. This fully updated new edition helps students understand how networks work and what is required to build and manage scalable mobile and secure networks. Clear student friendly chapters introduce, explain and summarize fundamental concepts and applications such as server architecture, network and transport layers, network design processes and tools, wired and wireless networking and network security and management. An array of pedagogical features teaches students how to select the appropriate technologies necessary to build and manage networks that meet organizational needs, maximize competitive advantage and protect networks and data from cybersecurity threats. Discussions of real world management and technical issues from improving device performance to assessing and controlling costs provide students with insight into the daily networking operations of actual businesses.

[Guide to TCP/IP](#) Laura A. Chappell, Ed Tittel, 2004 This text provides a comprehensive hands on look at TCP IP. It includes coverage of the latest TCP IP stack implementations in Windows XP, 2003 and 2000 as well as coverage of Ipv6 and SMTP. Practice skills as they are learned with extensive hands on projects in depth case projects and review questions in each chapter. Accompanying CD ROM contains a trial version of EtherPeek protocol analyzer software and sample protocol traces giving users direct hands on practice diagnosing protocol traces.
