*Repatriation and Erasing the Past* Elizabeth Weiss, James W. Springer, 2020-08-18 Engaging a longstanding controversy important to archaeologists and indigenous communities this volume takes a critical look at laws that mandate the return of human remains from museums and laboratories to ancestral burial grounds offering scientific and legal perspectives on the ways repatriation laws impact research      *Science in the Study of Ancient Egypt* Sonia Zakrzewski, Andrew

Shortland, Joanne Rowland, 2015-12-22 Science in the Study of Ancient Egypt demonstrates how to integrate scientific methodologies into Egyptology broadly and in Egyptian archaeology in particular in order to maximise the amount of information that might be obtained within a study of ancient Egypt be it field museum or laboratory based The authors illustrate the inclusive but varied nature of the scientific archaeology being undertaken revealing that it all falls under the aegis of Egyptology and demonstrating its potential for the elucidation of problems within traditional Egyptology      The World of Science Education, 2009-01-01 Each volume in the 7 volume series The World of Science Education reviews research in a key region of the world These regions include North America South and Latin America Asia Australia and New Zealand Europe and Israel Arab States and Sub Saharan Africa The focus of this Handbook is on science education in Arab states and the scholarship that most closely supports this program The reviews of the research situate what has been accomplished within a given field in an Arab rather than an international context The purpose therefore is to articulate and exhibit regional networks and trends that produced specific forms of science education The thrust lies in identifying the roots of research programs and sketching trajectories focusing the changing face of problems and solutions within regional contexts The approach allows readers to review what has been done and accomplished what is missing and what might be done next      **Museums of the World** Michael Zils, 2003      Museums of the World Marco Schulze, Boris Eggers, 2004
