*Towards a Hybrid, Flexible and Socially Engaged Higher Education* Michael E. Auer, Uriel R. Cukierman, Eduardo Vendrell Vidal, Edmundo Tovar Caro, 2024-02-25 We are currently witnessing a significant transformation in the development of education on all levels and especially in post secondary education. To face these challenges higher education must find innovative and effective ways to respond in a proper way. The pandemic period left us with profound changes in the way we teach and learn including the massive use of new means of communication such as videoconferencing and other technological tools. Moreover the current explosion of artificial intelligence tools mainly used by students is challenging teaching practices maintained for centuries. Scientifically based statements as well as excellent best practice examples are absolutely necessary. The 26th International Conference on Interactive Collaborative Learning ICL2023 which will take place in Madrid Spain between 26th and 30th September 2023 will be the perfect place where to present and discuss current trends in Higher Education. Since its beginning in 1998 this conference is devoted to new approaches in learning with a focus on collaborative learning in Higher Education. Nowadays the ICL conferences are a forum of the exchange of relevant trends and research results as well as the presentation of practical experiences in Learning and Engineering Pedagogy. In this way we try to bridge the gap between pure scientific research and the everyday work of educators.

NEWTON's proposed innovative technologies and pedagogies include adaptive multimedia and multiple sensorial media, virtual reality fabrication and virtual labs, gamification, personalisation, game based learning and self directed learning pedagogies. The main objectives are to encourage STEM education among younger generations and to attract students to STEM subjects making these subjects more appealing and interesting. Real life deployment of NEWTON technologies and developed educational materials in over 20 European educational institutions at primary, secondary and tertiary levels demonstrated statistical significant increases in terms of learner satisfaction, learner motivation and knowledge acquisition.
