Transforming the City Marion Orr,2007 A path breaking book the first to examine the evolution of community organizing in U S cities While embracing mobilization the contributors acknowledge the challenges inherent in globalization and the norms and values that shape contemporary American culture Still they reaffirm that community organizing has an important role to play as part of a broader progressive movement *Small Sample Size Solutions* Rens van de Schoot,Milica Miočević,2020-02-13 Researchers often have difficulties collecting enough data to test their hypotheses either because target groups are small or hard to access or because data collection entails prohibitive costs Such obstacles may result in data sets that are too small for the complexity of the statistical model needed to answer the research question This unique book provides guidelines and tools for implementing solutions to issues that arise in small sample research Each chapter illustrates statistical methods that allow researchers to apply the optimal statistical model for their research question when the sample is too small This essential book will enable social and behavioral science researchers to test their hypotheses even when the statistical model required for answering their research question is too complex for the sample sizes they can collect The statistical models in the book range from the estimation of a population mean to models with latent variables and nested observations and solutions include both classical and Bayesian methods All proposed solutions are described in steps researchers can implement with their own data and are accompanied with annotated syntax in R The methods described in this book will be useful for researchers across the social and behavioral sciences ranging from medical sciences and epidemiology to psychology marketing and economics The Mathematics Educator ,2003 *Mathematics* ,2004 New Challenges in Globalized Societies: Cross-cultural Studies and Test Adaptation Fco.
