### Scientific Inquiry Cycle: Review

Science helps researchers solve problems by applying knowledge and creating finding others' based with a test. Many such as understanding or waste management using science to make or improve solutions can have a positive impact. Understanding the problem fully, including its causes and effects, is the first step in finding an effective solution.

Designing solutions requires considering various constraints, such as budget, time, and safety concerns. Documenting the part of a solution might face challenges, especially, as it is important to weigh trade-offs carefully. For example, choosing materials for a house that may affect its cost and ease of use, which influence the effectiveness of the solution.

After developing a solution, documenting how it works, what constraints affected it, and any compromises made helps others learn and possibly improve on the idea. Communication, sharing knowledge clearly, and reflecting on the impacts of the innovation are essential steps. This process involves how sharing science locally encourages responsible decision-making and leads communities thrive.

- Ignoring the problems of the solution
  - Understanding the solution and safety
  - Showing how to solve the problem
  - Demonstrating that the solution has no risks

3. Which is an example of a trade-off?
- Choosing a solution without any trade
  - Ignoring safety concerns
  - Not caring about resources
  - Using unsafe materials

4. Why is it important to document a solution?
- To show how the solution was made
  - To make others learn
  - To make the problem more complex
  - To avoid documenting the solution

#### 6. Mark if the statement is True (T) or False (F).
