Endohedral Fullerenes: Electron Transfer and Spin Alexey A. Popov, 2017-05-23 This book discusses recent progress in endohedral fullerenes their production and separation techniques as well as their characterization and properties Furthermore the book delves into the all important issue of stability by investigating electron transfer between the encapsulated metal species and the carbon cage It also reviews spin based phenomena caused by the shielding of endohedral spin by the fullerene and analyzes formation of the spin states by charge transfer as studied by electron spin resonance Tuning of charge states of endohedral species and of spin states of both the cage and the cluster are explained Finally the book considers the recent discovery of magnetism in some endohedral fullerenes and the potential for quantum computing
