Quick Hits for Teaching with Technology Robin K. Morgan, Kimberly T. Olivares, 2012-02-29 An accompanying interactive website enhances the value of this innovative tool **Modules**, 2005 **Launching Learners in Science, PreK-5** Kerry C. Williams, George E. Veomett, 2007 Expertly describes how educators can plan a science curriculum that facilitates primary students' understanding, skills, and development in science, preparing them for careers requiring any level of scientific knowledge and giving them science literacy to make decisions that benefit society and the world. Robert D. Sweetland, Professor Wayne State College Design science instruction that helps develop enthusiastic young minds while meeting national standards. Teaching science means doing science and involves three elements: knowing content, knowing children and teachers, knowing themselves as teachers and learners. Kerry C. Williams and George E. Veomett describe principles and requirements that reflect National Science Education Standards for the active learning of science. They identify key ingredients for primary students and their development as young scientists. This resource is linked to research on cognitive and neural development and motivational theory from the work of Piaget and Vygotsky. Teachers inexperienced in science will discover new ways to think about science while they develop lessons that are rich, fun, and authentic for themselves and their students. All educators will find examples, questions, stories, and thought-provoking ideas to give students a strong start in science achievement plus Six key elements to build into science instruction: observing, representing, organizing, patterning, and questioning, experimenting and sharing. How-to's for incorporating inquiry workshops, centers, and projects in primary and elementary classrooms. A four-step system: choice, planning, doing, reviewing, that helps promote learning in science and across all subjects. **Launching Learners in Science PreK-5** helps educators teach science in a way that will expand their own confidence and let them make a lasting difference in children's lives. **Measurement and Evaluation in Physical Education and Exercise Science** Alan C.
