Comprehensive analysis of disaster risk reduction and management system for agriculture in Serbia Food and Agriculture Organization of the United Nations, 2024-01-22 This report aims to highlight the current strengths of the institutional disaster risk reduction DRR system for agriculture in Serbia as well as indicate existing gaps and capacity needs to further enhance it. A comprehensive assessment is conducted which includes a general overview of the country's agriculture sector and outlines the most frequent natural hazards that are impacting the sector. It is followed by an analysis of the existing legal policy and institutional structure and discusses various components of the system including the functioning of early warning systems, assessments of disaster risks post disaster, needs assessments including damages and losses assessments and the availability of agricultural insurance for farmers. It concludes by providing recommendations for capacity building interventions to strengthen the current system to reduce the adverse impacts of natural hazards in particular floods, landslides and droughts and climate change on agriculture in Serbia.
