The Art of Uncertainty David Spiegelhalter, 2025-03-04 Named a Best Book of the Year by Forbes and The Economist From our greatest living statistical communicator Tim Harford comes an invaluable data driven guide for understanding and learning to embrace risk and uncertainty in our daily lives How dangerous is our diet How much of sports falls into the realm of luck When authorities categorize a given event as highly likely how likely is that really Whether we're trying to decide if the benefits of a new medication are worth the chance of side effects or if artificial intelligence truly threatens humanity our lives are riddled with uncertainties both everyday and existential yet it can be difficult to know how to properly weigh all those unknowns Luckily for us renowned statistician David Spiegelhalter has spent his career dissecting data to resolve the apparently random and decode the many decisions we face with imperfect information In The Art of Uncertainty he shows how we can become better at dealing with what we don't know to make smarter choices in a world so full of puzzling variables In lucid lively prose Spiegelhalter guides us through the principles of probability illustrating how they can help us

think more analytically about everything from medical advice to sports to climate change forecasts He demonstrates how taking a mathematical approach to phenomena we might otherwise attribute to fate or luck can help us sort hidden patterns from mere coincidences better evaluate cause and effect and predict what's likely to happen in the future Along the way we learn how a misinterpretation of a probability contributed to the infamous Bay of Pigs fiasco why a ship twice the size of the Titanic sank without a trace and why we can be so confident that no two properly shuffled decks of cards have ever been in the same order Sparkling with wit and fascinating real world examples this is an essential guide to navigating uncertainty while also retaining the humility to admit what we don't or simply cannot know

HC 811 - Financial Support for Students at Alternative Higher Education Providers Great Britain. Parliament. House of Commons. Committee of Public Accounts, 2015 Approximately 140 institutions offering higher education are termed alternative providers These alternative providers comprise a diverse range of organisations ranging from private companies to charitable institutions They do not receive government grants directly but do access public funding through student loans which are used to pay their fees Following the announcement of higher education reforms in 2011 and the associated increase in tuition fee loans there has been substantial and rapid growth in the sector Between 2010/11 and 2013/14 the number of students claiming support for courses at alternative providers rose from 7 000 to 53 000 Over the same period the total amount of public money paid to students at alternative providers through tuition fee loans and maintenance loans and grants has risen from around 50 million to around 675 million The Department has overall responsibility for oversight of publicly funded higher education including alternative providers with publicly funded students The Department did not learn from previous Government experience furthermore it has been slow to react to warning signs The rapid expansion in numbers was concentrated in five colleges that accounted for 50% of the expansion 20% of students receiving funding were not registered for a qualification and drop out rates were very high in some institutions There was also evidence from whistleblowers that proficiency in English language was not tested that some institutions were recruiting students on the streets and that students claiming funding were not attending colleges

MasterClass in History Education Christine Counsell, Katharine Burn, Arthur Chapman, 2016-10-06 MasterClass in History Education draws on international research and practice to present effective and engaging approaches for history teachers who want to explore the ways in which reading research and reflection can support the development of history teaching and learning in the classroom At the heart of the book is a series of professional enquiries carried out by experienced history teachers working in a range of contexts Each history teacher addresses clear questions arising from their practice and together they illustrate various approaches to data collection data analysis and argument These history teachers also show how they drew on diverse scholarship in history and history education including many publications by other history teachers In eight further chapters other experts ranging from practitioner scholars to researchers in diverse fields such as history history education teacher education teacher research and curriculum theory

reflect on the distinctive insights that these teachers offer and explore connections with their own fields The combination of perspectives and the depth of knowledge of the varied contributors reveal the importance of different kinds of relationship between theory and practice The links between classroom realities and research and the critical use of different kinds of text will support history teachers in developing their practice and professional voice
