Culture, Identity and Intense Performativity Tim Jordan, Brigid McClure, Kath Woodward, 2017-01-12 Being in the zone means performing in a distinctive unusual pleasurable and highly competent way at something you already regularly do dancing or playing a viola computer programming tennis and much more What makes the zone special This volume offers groundbreaking research that brings sociological and cultural studies to bear on the idea of being in the zone There is original research on musicians dancers and surfers which shows that being in the zone far from being exclusively individualised and private but must be understood as social and collective and possibly accessible to all The zone is not just for elite performers Being in the zone is not just the province of the athlete who suddenly and seemingly without extra effort swims faster or jumps higher or the musician who suddenly plays more than perfectly but also of the doctor working under intense pressure or the computer programmer staying up all night The meaning of such experiences for convincing people to work in intense conditions often with short term contracts is explored to show how being in the zone can have problematic effects and have negative and constraining as well as creative and productive implications Often being in the zone is understood from a psychological viewpoint but this can limit our understanding This volume provides the first in depth analysis of being in the zone from social and cultural viewpoints drawing on a range of theories and novel evidence Written in a stimulating and accessible style Culture Identity and Intense Performativity Being in the Zone will strongly appeal to students and researchers who aim to understand the experience of work creativity musicianship and sport Issues of the body are also central to being in the zone and will make this book relevant to anyone studying bodies and embodiment This collection will establish being in the zone as an important area of enquiry for social science and the humanities

The book presents key theoretical perspectives and empirical findings on historical trends, geographical patterns, drivers, and socio-economic impacts of both voluntary and involuntary migration in West Africa, a region that is characterised by high levels of mixed migration flows. The book is divided into three main parts: changing patterns and governance of migration, managing environmental and forced migration, and diaspora transnationalism and development. The chapters raise key research questions and outline recommendations for improving migration governance, protecting migrants, and harnessing the benefits of migration for socio-economic development for both countries of origin and destination of migrants. As such, this Regional Reader provides an interesting read to students, academics, researchers, migration experts, development practitioners, and policy makers.
