

GEOGRAPHY - GRADE 12

2014 Learn Xtra Geography Notes

Bertram C. Bruce

2014 Learn Xtra Geography Notes:

Creativity Harriet Hawkins,2016-10-04 Creativity whether lauded as the oil of the 21st century touted as a driver of international policy or mobilised by activities has been very much part of the zeitgeist of the last few decades Offering the first accessible but conceptually sophisticated account of the critical geographies of creativity this title provides an entry point to the diverse ways in which creativity is conceptualized as a practice promise force concept and rhetoric It proffers these critical geographies as the means to engage with the relations and tensions between a range of forms of arts and cultural production the cultural economy and vernacular mundane and everyday creative practices Exploring a series of sites Creativity examines theoretical and conceptual questions around the social economic cultural political and pedagogic imperatives of the geographies of creativity using these geographies as a lens to cohere broader interdisciplinary debates Central concepts cutting edge research and methodological debates are made accessible with the use of inset boxes that present key ideas case studies and research The text draws together interdisciplinary perspectives on creativity enabling scholars and students within and without Geography to understand and engage with the critical geographies of creativity their breadth and potential The volume will prove essential reading for undergraduate and post graduate students of creativity cultural geography the creative economy cultural industries and heritage

Education for Underprivileged

Primary and Secondary Students in Malaysia Lay Yoon Fah,2021-06-21 The best education system provides the best education to all children irrespective of their ethnic group or socio economic background Malaysian education system aims to ensure that all children irrespective of who their parents are and where they are schooling will be equipped with the basic needs to succeed in their future educational endeavours and eventually in daily life and the workforce Malaysian education system strives to narrow the socio economic gap between rural and urban as well as gender in student achievement by 2020 Reducing socioeconomic disparities between rural and urban are likely to have an impact on the achievement gap among students The education system in Malaysia will actively support social mobility by providing additional supports to those who are less fortunate and thus ensure socio economic background of students is no longer a determinant factor of their success in life However in the effort to realize equity in education to all children in Malaysia we are confronted with all sorts of problems and challenges Empirical studies with scientific explanations will provide insights into how education for underprivileged primary and secondary students in Malaysia can be further improved to ensure equal accessibility to quality education This book attempts to bring together prominent researchers and educators in the field of rural education to share their findings experiences reflection and vision on the emerging trends in rural education in the country The book will be of special interest to academics and researchers in the field of rural education curriculum designers policy makers educators teacher educators trainee teachers school principals school inspectorates undergraduate and postgraduate students in universities and colleges in the country

Knowledge Guided Machine Learning Anuj Karpatne,Ramakrishnan

Kannan,Vipin Kumar,2022-08-15 Given their tremendous success in commercial applications machine learning ML models are increasingly being considered as alternatives to science based models in many disciplines Yet these black box ML models have found limited success due to their inability to work well in the presence of limited training data and generalize to unseen scenarios As a result there is a growing interest in the scientific community on creating a new generation of methods that integrate scientific knowledge in ML frameworks This emerging field called scientific knowledge guided ML KGML seeks a distinct departure from existing data only or scientific knowledge only methods to use knowledge and data at an equal footing Indeed KGML involves diverse scientific and ML communities where researchers and practitioners from various backgrounds and application domains are continually adding richness to the problem formulations and research methods in this emerging field Knowledge Guided Machine Learning Accelerating Discovery using Scientific Knowledge and Data provides an introduction to this rapidly growing field by discussing some of the common themes of research in KGML using illustrative examples case studies and reviews from diverse application domains and research communities as book chapters by leading researchers KEY FEATURES First of its kind book in an emerging area of research that is gaining widespread attention in the scientific and data science fields Accessible to a broad audience in data science and scientific and engineering fields Provides a coherent organizational structure to the problem formulations and research methods in the emerging field of KGML using illustrative examples from diverse application domains Contains chapters by leading researchers which illustrate the cutting edge research trends opportunities and challenges in KGML research from multiple perspectives Enables cross pollination of KGML problem formulations and research methods across disciplines Highlights critical gaps that require further investigation by the broader community of researchers and practitioners to realize the full potential of KGML

Thinking with Maps Bertram C. Bruce,2021-05-15 A 2022 Choice Reviews Outstanding Academic Title Spatial reasoning which promises connection across wide areas is itself ironically often not connected to other areas of knowledge Thinking with Maps Understanding the World through Spatialization addresses this problem developing its argument through historical analysis and cross disciplinary examples involving maps The idea of maps here includes traditional cartographic representations of physical environments but more broadly encompasses the wide variety of ways that visualizations are used across all disciplines to enable understanding to generate new knowledge and to effect change The idea of thinking with maps is also used broadly Maps become not simply one among many items to learn about but indispensable tools for thinking across every field of inquiry in a way similar to that of textual and mathematical language Effective use of maps becomes a way to make knowledge much as writing or mathematical exploration not only displays ideas but also creates them The book shows that maps for thinking are not just a means to improve geographic knowledge as valuable as that may be Instead they provide mechanisms for rejuvenating our engagement with the world helping us to become more capable of facing our global challenges This book has a broader aim It is fundamentally about general

principles of how we learn and know It calls for a renewed focus on democratic education in which both the means and ends are democratic Education just as the political realm should follow Dewey's dictum that democratic ends need democratic methods for their realization Maps and mapping are invaluable in that endeavor [Urban Politics of Human Rights](#) Janne Nijman, Barbara Oomen, Elif Durmuş, Sara Miellet, Lisa Roodenburg, 2022-11-14 Increasingly urban actors invoke human rights to address inequalities combat privatisation and underline common aspirations or to protect vested private interests The potential and the pitfalls of these processes are conditioned by the urban and deeply political These urban politics of human rights are at the heart of this book An international line up of contributors with long term engagement in this field shed light on these politics in cities on four continents and eight cities presenting a wealth of empirical detail and disciplinary theoreticalisation perspectives They analyse the city society the urban actors involved and the mechanisms of human rights mobilisation In doing so they show the commonalities in rights engagement in today's globalised and often deeply unequal cities characterised by urban law private capital but also communities that rally around concepts as the right to the city Most importantly the chapters highlight the conditions under which this mobilisation truly contributes to social justice be it concerning the simple right to presence cultural rights accessible housing or in times of COVID health care [Urban Politics of Human Rights](#) provides indispensable reading for anyone with a practical or theoretical interest in the complex deeply political and at times also truly promising interrelationship between human rights and the urban Creative Commons

Attribution Non Commercial No Derivatives 4.0 license [Spacematrix](#) Meta Berghauser Pont, Per Haupt, 2023-05-23 Spacematrix explores the potential of urban density as a tool for urban planning and design This revised and extended edition of Meta Berghauser Pont and Per Haupt's 2010 volume includes an extensive analysis of the relations between density urban form and performance a prerequisite for understanding and successfully predicting the effects of specific designs and planning proposals The density database that is an integral part of the book has been expanded and now includes 142 examples from five capitals in Europe as well as examples from Asia Berghauser Pont and Haupt demystify the use of concepts such as urbanity compact city and park city by challenging the reliability of such concepts and critically examining the possibility of redefining them through quantification using multiple density measures Spacematrix is of interest to professionals working in the field of urbanism such as architects urban planners and designers as well as developers economists engineers and policymakers It also offers researchers a method to quantitatively describe urban form and connect this to a wide range of performances [a list of valuable old books](#) bernard quartich, 1880 [Urban Music](#)

and Entrepreneurship Joy White, 2016-11-03 Youth unemployment in the UK remains around the one million mark with many young people from impoverished backgrounds becoming and remaining NEET Not in Education Employment or Training However the NEET categorisation covertly disguises and obscures the significance of the diverse range of activities achievements and accomplishments of those who operate in the informal creative economy With grime music and its related

enterprise a key component of the urban music economy this book employs the inherent contradictions and questions that emerge from an exploration of the grime music scene to build a complex reading of the socio economic significance of urban music Incorporating insightful dialogue with the participants in this economy White challenges the prevailing wisdom on marginalised young people whilst also confronting the assumption that the inertia and localisation of the grime culture results from its close links to NEET members and the informal sector Offering an ethnographic and timely critique of the NEET classification this compelling book would be suitable for undergraduate and post graduate students interested in urban studies business work and labour education and employment ethnography music and cultural studies Yojana ,2014 A
