**Cognitive Processes in Individual and Collective Creativity: A Cross-Cultural Perspective** Chang Liu, Linden John Ball, Haiying Long, Wangbing Shen, 2019-12-30 Creativity the highest level of human wisdom has become an increasingly important concept in different fields of psychological enquiry particularly because it is portrayed as contributing to many aspects of society including personal development economic prosperity and technological advancement However although considerable research attention from a wide range of disciplinary backgrounds has focused on trying to understand creativity the specific nature of creativity its theoretical underpinnings and cognitive mechanisms remain unclear not least when it comes to the understanding of creativity at the individual level and creativity at the collective level On the one hand there are crucial distinctions between individual and collective creativity On the other hand the process of being creative involves not only independent or individual efforts but also interdependent or collective efforts Understanding these differences and interrelationships is crucially important in studies of creativity In this Research Topic we bring together research from a wide variety of cognitive and psychological approaches and perspectives in order to provide a comprehensive and in depth understanding of creativity at both the individual and collective levels Furthermore cognitive mechanisms in the creativity process are unavoidably affected by sociocultural factors and these mechanisms look different across cultures particularly between Eastern cultures and Western cultures two worlds that often imply dramatically dissimilar values and perspectives Despite the fact that many studies have compared and contrasted these two cultures in various respects little research has focused on the specific topic of cultural variation in creative cognition In addition very few studies have examined the differences in the cognitive mechanisms underpinning the cultural variations that can be observed at a surface level This Research Topic aims to fill this gap in the literature and examine the cognitive processes and mechanisms in the creativity

process at both individual and collective levels across different cultures by using theoretical and empirical evidence

**Feedback to Feed Forward** Amy Tepper,Patrick Flynn,2018-06-13 Feedback that works for leadership that makes a difference As a leader you know that feedback is essential to teachers growth and development But crafting the right feedback can be daunting How do you conduct comprehensive observations accurately analyze lessons for effectiveness and develop high leverage action steps that bring lasting change to teacher practices and student outcomes This how to book designed for leaders in all roles and at all experience levels provides a dynamic yet practical leadership model focused on precisely those key tasks Features include Comprehensive explanations of standards and descriptions of discrete core skills Explicit think alouds ready to use strategies and field tested lesson examples Evidence collection notes with templates from live observations Feedback samples across grade levels and content areas Replicable case studies for professional learning Simply inspecting teaching practice through observation might be easy providing feedback that feeds forward and promotes growth is far more challenging With this comprehensive learning tool you ll use feedback to make the most of your role as a leader of learning for both teachers and students Feedback to Feed Forward has been recognized for focusing on practices that have high effect sizes and will help you translate the groundbreaking Visible Learning research into practice When educators use strategies that have high effects greater than 0.40 they can accelerate student achievement The power of the Visible Learning research lies in helping educators understand which factors have the highest impact on student achievement so that educators can begin making strategic decisions based on evidence that will utilize their time energy and resources to the best extent possible The Visible Learning research is based on Professor John Hattie s unmatched meta analysis of more than 1 600 research reviews comprising 95 000 studies involving more than 300 million students the world s largest evidence base on what works best in schools to improve student learning From that research Dr Hattie identified more than 250 factors that have an impact on student achievement
