

VCMA Condensate Pump Series

This pump automatically removes condensate water that drips from an air conditioner evaporator coil, refrigeration equipment coil, condensing furnace, or condensing boiler. The pump is controlled by a float switch mechanism, which automatically starts and stops the pump.

Some models also include a high-water level switch, which opens a thermostat circuit when the pump reservoir is full, stopping production of condensate. Alternatively, this switch can be reconfigured to close a circuit, which can operate an external alarm or relay, (purchased separately).

This product is covered by a Limited Warranty for a period of 12 months from the date of original purchase by the consumer. For complete warranty information, refer to www.LittleGiant.com.
