Illustrating the Fur Bearing Animals of North America the Skins of Which Have a Market Value Describing the Various Animals Geographical Location Habits Mode of Living Propagation and How to Hunt and Trap Them In the process of evolution when animal life was engendered from the vegetable the resultance of some form of copulation the conception of which seems impossible for local realization and description The theological version of Creation and division of life falls asunder excepting when leaning upon Darwin's popular intimation that at some remote period life may have been breathed into one or more forms by the Creator but very probably the infinite spark of life was inborn in the very existence of being Leaving the vegetable and animal transmigrative period and skipping a million years we find the evolutionary epoch has somewhat specialized the living forms but man is yet at a great distance Nature or the natural selection and survival of the fittest has conspicuously developed higher and higher species and finally after an elapse of ages and ages omitting some detailed histological differentiations we behold the concrete result man The mind can scarcely perceive the slow progress in the advancement of man and the necessary ages required to produce man as we are and as we find him today About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
