Annette Messager Annette Messager, 1995 **The Museum Establishment and Contemporary Art** Rebecca J. DeRoo, 2006-01-09 This book provides an in depth account of the protests that shook France in 1968 and which served as a catalyst to a radical reconsideration of artistic practice that has shaped both art and museum exhibitions up to the present Rebecca DeRoo examines how issues of historical and personal memory the separation of public and private domains and the ordinary objects of everyday life emerged as central concerns for museums and for artists as both struggled to respond to the protests She argues that the responses of the museums were only partially faithful to the aims of the activist movements Museums in fact often misunderstood and misrepresented the work of artists that was exhibited as a means of addressing these concerns Analyzing how museums and critics did and did not address the aims of the protests DeRoo highlights the issues relevant to the politics of the public display of art that have been central to artistic representation in France as well as in North America

crossed with an open mind **Counterpractice** Rakhee Balaram, 2022-03-08 Counterpractice highlights a generation of women who used art to define a culture of experimental thought and practice during the period of the French women's movement or Mouvement de Libération des Femmes 1970-81. It considers women's art in relation to some of the most exciting thinkers to have emerged from the French literature and philosophy of the 1970s: Hélène Cixous, Luce Irigaray and Julia Kristeva, forcing a timely reconsideration of the full spectrum of revolutionary practices by women in the years following the events of May 68. Lavishly illustrated with over 200 images, the book also features an illuminating foreword by art historian Griselda Pollock.

Practice zero tolerance Adel Abdessemed, 2007 This book looks at the behavior of individuals at risk in the insurance industry: decision makers and policy makers at the local, state and federal level involved in the selling, buying and regulating of insurance. It compares their actions to those predicted by benchmark models of choice derived from classical economic theory. Where actual choices stray from predictions, the behavior is considered to be anomalous. Howard C. Kunreuther, Mark Pauly and Stacey McMorrogh attempt to understand why these anomalies sometimes occur and sometimes do not in many cases using insights from behavioral economics. The authors then consider if and how such behavioral anomalies could be modified to improve individual and social welfare. This book is in no way a defense of the insurance industry nor an attack on it. Neither is it a consumer guide to purchasing insurance, although the authors believe that consumers will benefit from the insights it contains. Rather, this book describes situations in which both public policy and the insurance industry's collective posture need to change. This may require incentives, rules and institutions to help reduce both inefficient and anomalous behavior, thereby encouraging behavior that will improve individual and social welfare.
