Scientific Inquiry Cycle: Review

Science helps researchers solve problems by applying knowledge and creating testing often based on a test theory such as understanding or testing a hypothesis using evidence or ideas or hypotheses solutions can have a positive impact. Understanding the problem fully, including its causes and effects, is the first step in finding an effective solution.

Designing solutions requires considering various constraints, such as budget, time, and safety concerns. Documenting the part of a solution might solve a problem, assessment, and it is important to weigh these trade-offs carefully. For example, creating materials for a house that may affect its cost and ease of use, which influence the effectiveness of the solution.

After developing a solution, documenting how it works, what constraints affected it, and any compromises that have been made and possibly involve on the way. Communication, sharing knowledge clearly, and reflecting on the impacts of the innovation and scientific steps. This process involves how sharing science locally encourages responsible decision-making and leads communities thrive.

6. Mark the best answer for each question.

1. What is the first important step when applying science to solve a local problem?
- Designing a solution immediately
 - Using the most expensive materials
 - Ignoring safety concerns
 - Understanding the problem fully

2. What does documenting constraints in a solution help with?
- Ignoring the problems of the solution
 - Documenting constraints like budget and safety
 - Showing how to solve the problem
 - Demonstrating that the solution has no risks

3. Which is an example of a trade-off?
- Finding a solution without any tools
 - Ignoring safety concerns
 - Time taken to finish the project
 - Using unsafe materials

4. Why is it important to document a solution?
- To show how the solution was made
 - To make others aware
 - To record the problems and constraints
 - To avoid documenting the solution

6. Mark if the statement is True (T) or False (F).

When making a solution, it is important to consider the trade-offs between the benefits and the costs. Understanding the problem fully, including its causes and effects, is the first step in finding an effective solution.

Answer for each question.

6.1. Document a problem fully before designing a solution?

6.2. Why must this be considered in designing a solution?

6.3. Trade-off that might happen when creating a new idea?

6.4. How might improve scientific solutions in communities?

6.5. Why are trade-offs essential in scientific problem-solving?
